

I) Health Psychology in Russia

Unfortunately, our country is closing now for European information. There are no any new events here. Because of course of euro to rubles rose twofold, our group in EHPS is going to be smaller and smaller

II) Education, training & professionalization

We have in Russia 607 state universities and 358 non state ones. And just about 10 Master programs in Health Psychology. We have no this kind of profession. And the specialist in Health psychology could work as psychologist. There are no any interest for students to receive this speciality.

III) Activities

1. In any conferences of our department of developmental psychology and family pedagogics in Herzen state pedagogical university we have section on Health psychology. But they do not influence on all situation in country
2. This year we are beginning to publish new journal Integrated Research of Childhood. It is planned to be two languages (English, Russian). We invite all members of EHPS to participate in this journal.
3. This year we have planned to open the laboratory of integrated research of childhood. We plan to include our students into research in Health psychology
