

I) Health Psychology in Russia

Unfortunately, our country is now under sanctions, the course of rubles has fallen twice against the Euro, and our group in EHPS is going to be smaller and smaller.

II) Education, training & professionalization

The most interesting event was the invitation of Ralf Schwarzer in the Herzen State pedagogical university in Saint-Petersburg. He delivered lectures on the topic "Health behaviour change: Constructs, mechanisms, and interventions". The lectures were held on May 3-4, 2018. The lectures were very useful for understanding health psychology from the European point of view because of there is big gap between Russian version health psychology and European one.

III) Activities

Next year in Moscow will be held the 16th European Congress of Psychology (July 2-5 2019). We do hope that the Congress will attract the participants from EHPS. You could find it on <https://ecp2019.ru>
